Owner and Managing director of 11 Dimensions GmbH, Germany:

 Oliver Allenbacher

Partners of 11 Dimensions Kenya Inc., Kenya:

 Oliver Allenbacher, CEO

 Abdallah Kassim, COO

 Shamsa Kassim, CFO

A short history:

The company was founded in July 2000 by Oliver Allenbacher, inventor of a text editor in 1983, with the aim to turn his visions into reality.

11 Dimensions has been working with experts and partners from the beginning

The annual turnover has been over € 100K per year ever since.

In March 2009 the subsidiary 11 Dimensions Kenya Inc. was founded and first projects were already successfully completed.

Subject of our business

11 Dimensions has been concentrating on IT consulting whereby different areas of consulting are offered in:

- Project management
- Process consulting
- Management consulting
- International projects and communication
- East Africa IT business and market researches
- Main IT consulting in Middleware/EAI and databases
- Custom Application development in CRM, ERP etc.
- Web development
- Support of Standard software
- System integration of heterogeneous systems

Furthermore different software products from the above mentioned are developed and sold. They will be described in the "products" section of this document.

Mission, Vision and Ethics

Our mission is to be the best in delivering exclusive consulting to achieve lasting improvements. Higher dimensions means in this context to recognize and appreciate hidden potential and possibilities.

Our visions:

It has always been important to us to obtain positive leadership and management. Even more so today when this virtue has become rare

Many expect a rise in Africa because of the World Cup 2010 including us for different reasons:

The continent is awakening after markets in Asia and South America have emerged. The industrial world's financial crisis has not affected them much, the general political stability is improving and the amount of natural resources is outstanding.

We concentrate on East Africa because of the bright future; it has industrially remarkable ICT efforts in this region and our good contacts with them.

Ethics is very important to us as it expresses the way we conduct our business.

Respect, fairness and integrity are the cores and beginnings of a sustainable relationship which we can strive to maintain.

Your benefits

We help you lower costs and better your business in quality.

- You benefit from our sound knowledge in diverse industries like:
 - Industry (automotive, semi-conductor, electronics, aerospace, chemistry, construction etc.)
 - Finance (banking, stock market, life and property insurance etc.)
 - Commerce (E-Commerce, retailers, wholesalers, logistics etc.)
 - Telecoms (mobile, landline, internet, wireless, electronic payment etc.)
 - Healthcare, Media, Public Administration, Research/Science etc.
- Resolve conflicts and unstructured problems
- Good decisions in present time to enable a better future
- Improving the company structure and culture
- Improving the company's knowledge ability and its stakeholders
- Benefit from our international network and outstanding communication skills
- Our ideas and problem solving are groundbreaking.

"The Difficult is that which can be done immediately; the Impossible is that which takes a little longer." (George Santayana, Spanish philosopher)

Our competence

Here is a list of soft and hard skills which we offer:

- Languages: English, German, French, Kiswahili, Spanish, Turkish and Arabic
- Cultural awareness and knowledge especially in the European, African and Asian region
- International communication
- Organizational talents and reputation to deliver on time
- Problem and conflict management
- Training and coaching experience
- System integration of legacy and modern IT world

Our technology expertise encompasses a large number of skills which are shortlisted here focusing on six main categories.

Java, C, C++, C#, VBx, PHP, Perl, Script languages, PL/1, COBOL, PL/SQL, T-SQL etc.

Web technology: CMS, WSLT, XML, HTML, ASP, SSI etc.

Standard software: Portal Infranet, Kenan Arbor, Geneva, Siebel, Clarify, Peoplesoft, Enfinity, Kondor+ etc.

Resources

11 Dimensions GmbH liaises with us employees, freelancers and partner companies.

All employees have more vast experience and some have more than 20 years of professional experience in ICT.

We have acquired profound knowledge on industries, business skills and information technology itself.

Our emphasis is on teamwork and dedication.

Our team has obtained good training and coaching knowhow giving courses about personal development and IT skills.

The team members' qualification is facilitated by us as constant learning keeps us top in business world.

Our partners and employees are available in different locations if necessary and maintain their network all over the world.

We believe that networking will become increasingly important to facilitate smaller entities of workforce performing best.

Products

SQLExecute

11Dimensions SQLExecute is one of the leading SQL execution tool on the market which automatically logs the processed statements and creates their undo statements in a multi-database environment.

Connections to multiple database systems with different vendors are possible. This feature also saves the effort of running your queries distributed and manage connections yourself. Organizations who have implemented it have achieved 30% to 50% greater productivity compared to alternative technologies.

Automated logs are created which enable one to identify the content of your query and timeframe.

Automated creation of undo statements which can be used to revert queries partly or fully.

Scheduled execution is possible.

SQL Execute provides proven performance and reliability and facilitates the best possible query technology.

Application Integration Server

Integrate complex Operating Systems with ONE solution.

- Frees and re-uses important business applications
- Increases flexibility and stability
- Enhances your multi platform environment
- Saves costs due to high scalability

XConnectivity

- XConnectivity automates your connectivity creations and installations
- Automates time wasting configuration
- Saving cost and time
- Increases flexibility and stability

11 Dimensions WebDB

Construction kit for development of web applications.

In the modern market there is increase in demand of having access to and being able to change enterprise data at different places which includes foreign countries as well. Examples are:

- The connections between subsidiaries and partners, representatives, clients or branch offices.
- Different client environments like Windows, Linux, MacOS or UNIX.
- Demand to unify and to create interfaces to standard software products for the previous applications which were not able to communicate with each other.

The benefits are:

- Manage company's business
- Available at different locations all the time
- Available wherever you are
- Full functionality
